What is the evidence for wearing masks re Covid-19?

In August 2021, I asked this question of Grant Stevens, the Commissioner of Police and State Coordinator in South Australia **who has the power to mandate that people wear masks...**

My request for evidence received this answer: "...the State Coordinator acts on the best available advice from relevant experts, including the Chief Public Health Officer and her team at SA Health", see this link: <https://vaccinationispolitical.files.wordpress.com/2021/10/response-from-covid-coordination-unit.pdf>

In other words, no evidence provided...

See my original email to Grant Stevens below.

For the attention of:

Grant Stevens
Commissioner of Police
South Australia Police

Commissioner Stevens, currently 1.77 million South Australians are being compelled to wear masks in public places[1] - **why?**

Why are people being compelled to impair their breathing with masks?

What evidence is the Marshall Government using to back this intervention? There are no references provided under the 'current activity restrictions' or Common questions webpages. (See copies attached.)

This muzzling is a crude means of government control and empty virtue signalling, **supposedly to protect against a virus which isn't a serious threat to most people**[2], despite all the media fear-mongering, including courtesy of the taxpayer-funded Morrison Government's \$40 million covid-19 'vaccine' promotion.[3]

I suspect most people are re-using masks repeatedly...if they're sodden with 'the virus' this is a useless exercise. If the Marshall Government genuinely wanted to slow the spread of the virus, **a virus which isn't a serious threat to**

most people[2], much better to request people stay home and recuperate if they have obvious symptoms. **This is only common sense**, sadly lacking these days when people with respiratory symptoms are pressured to line up waiting for hours for PCR testing.

Again Commissioner Stevens, **why is the Marshall Government mandating that 1.77 million South Australians wear masks in public places, a direction signed under your hand? Please provide the evidence being used to support this intervention across the South Australian population.**

I request your early response.

Sincerely

Elizabeth Hart
