### For the attention of:

Peter Malinauskas  
Leader of the SA Labor Party  
Premier of South Australia

Peter Malinauskas, according to *The Advertiser*, Adrian Esterman warns that mask wearing should return in South Australia "as new and significantly more transmissible Covid strains take hold". See: **Top SA epidemiologist Professor Adrian Esterman urges return of mask wearing as new variants emerge**. 3 May 2022. (Copy attached.)

**Adrian Esterman** is at the University of South Australia, where one of his "main roles is to provide advice on biostatistics and epidemiology".

**What evidence is Adrian Esterman using to back his directive that "the community should "absolutely" be wearing masks as the new strain takes hold"?**

Consider for example this summary: **More than 150 comparative studies and articles on mask ineffectiveness and harms**. Paul Elias Alexander. Brownstone Institute, 20 December 2021.

**Who is Adrian Esterman to be dictating what people should be doing?** There's no end of these people lurking in universities, pontificating on matters which may impact on the bodily autonomy of millions of people. Esterman may flourish academic affiliations, but so what? Let's see the evidence backing his statements.

### Is Adrian Esterman influencing Covid-19 policy in South Australia?

(I asked these questions in my comment submitted on the article on *The Advertiser*, but my comment was rejected, yet again the conflicted Murdoch media suppressing legitimate questions relevant to the grossly disproportionate and ill-targeted Covid-19 response.)

Peter Malinauskas, there must be scrutiny of unelected people such as Adrian Esterman, who are trying to exercise control over the bodily autonomy of 1.77 million Australians.

**On the subject of masks, why are 'unvaccinated' teachers and police being compelled to wear masks/muzzles and use daily RAT tests?** Is this deliberate to mark and single them out, punishing them for not complying to regular injections of experimental Covid-19 'leaky vaccines'? Why are jab free teachers and police being discriminated against, **when it seems people who have had any number of Covid jabs can still be infected and transmit the virus?** What is the logic/evidence behind this punitive assault on the bodily autonomy of people who choose to rely on their own natural immune response to the virus? The World Health Organisation admits "Most people infected with the virus will experience mild to moderate respiratory illness and recover without requiring special treatment". (See attached.) **Why would critical thinking people not at serious risk of Covid-19 take the risk with the unknown cumulative effects of repeated injections with experimental Covid-19 'leaky vaccines'?** But millions of people have been denied evaluating their own level of risk and giving their 'valid voluntary consent' to the Covid jabs - instead they've been pressured, coerced and manipulated to submit to the experimental Covid jabs, in contravention of 'valid consent' as outlined in ***The Australian Immunisation Handbook***...and also in contravention of the **Helsinki Declaration**.

Please provide transparency and accountability on this matter Peter Malinauskas.

Sincerely  
Elizabeth Hart
