

Vaccination is political - compulsory Covid-19 vaccination in Australia

Hi All, recently I participated on a panel discussing coercive Covid-19 vaccination and the politics of voluntary informed consent, with suspended doctor William Bay, and Graham Hood and John Larter, as part of their 'Doctors with Voices' series.

The Australian Government's Covid-19 vaccination rollout is the most serious political issue in Australia today, as these coercive medical interventions have stolen the personal autonomy and bodily integrity of millions of people.

At the start of the discussion I gave a slideshow presentation titled **Vaccination is political** - see the slides via this link: <https://vaccinationispolitical.files.wordpress.com/2023/04/club-grubbery-vaccination-is-political.pdf>

Yes indeed, **vaccination is political...particularly with Covid vaccinations being mandated around Australia, trashing voluntary informed consent.**

The medical profession has been at the forefront of this disaster, they should have rejected mandated medical interventions from the beginning.

The discussion is accessible via these links:

Rumble: <https://rumble.com/v2jhs4u-graham-and-john-interview-elizabeth-and-william-about-informed-consent....html>

Part of my presentation was presented as a timeline of events featuring **Scott Morrison, former Australian prime minister and leader of the so-called 'Liberal Party', and Chief Medical Officers Paul Kelly, and (formerly) Brendan Murphy.**

Consider for example two slides dated 4 June 2021, which show that the medical advisory group headed by CMO Paul Kelly (the AHPPC) did not recommend compulsory COVID-19 vaccines for aged care workers, noting: **"Mandating COVID-19 vaccination must balance the rights of an individual in the workplace against the public health benefits of vaccination at the time..."**

On the same day it was reported by the ABC that **Scott Morrison will use National Cabinet to lobby state governments to go against the health advice on COVID vaccinations, i.e. "The Prime Minister will lobby state and territory leaders to overrule medical experts' advice and force aged care workers to get the coronavirus vaccine...The panel of health experts, chaired by the Chief Medical Officer, has advised for a second time against making the coronavirus vaccine compulsory".**

This happened in broad daylight, I remember it at the time.

The 'medical experts' advice' was overruled by Scott Morrison and the National Cabinet.

Making vaccination compulsory for aged care workers was a *political decision*.

Once a vaccination mandate was accepted for one group, aged care workers, this was the thin end of the wedge, which subsequently led to a cascade of mandates - **the Morrison mandates** - across the country, with the devastating consequence of trashing voluntary informed consent, and destroying personal autonomy and bodily integrity, with the apparent plan to destroy freedom in this country, to force people to be compliant to medical interventions on demand - what treachery! (Note that this plan failed in the UK, where health practitioners in the NHS effectively rebelled against the Boris Johnson government imposed Covid vaccination mandates.)

Wow... How to address this now? **Why did CMO Paul Kelly and the AHPPC ultimately capitulate to Scott Morrison's demand to make vaccination compulsory for aged care workers, with more mandates to follow, and cascade around the country?**

Please see my presentation and discussion with suspended doctor William Bay, Graham Hood and John Larter via the links above, there's a fair bit of information compiled in there. See the two slides mentioned above in the presentation and the slide show, plus referenced documents are attached.
