For the attention of:

Mark Butler
Minister for Health and Aged Care
Australian Government Department of Health and Aged Care

Dear Mark Butler, **please provide sources for information sent to the Board Chairs of Residential Aged Care Providers**, in a letter from Paul Kelly, Chief Medical Officer, and Janet Anderson, Aged Care Quality and Safety Commissioner, dated 24 May 2024, copy also attached: <https://www.health.gov.au/sites/default/files/2024-05/covid-19-information-for-board-chairs-of-residential-aged-care-providers.pdf>

There are no sources provided for this information:

People who were vaccinated for influenza last year had a reduced risk of hospitalisation with flu by 68% and the need to visit a GP due to flu by 64%. While COVID-19 vaccine effectiveness data continues to emerge, COVID-19 vaccines have been shown to be effective against hospitalisation (reducing the risk by 71-77%), and against ICU admission (by 73%).

Please provide me with the evidence/sources that support this information.

I look forward to your early response.

Kind regards
Elizabeth Hart
