

Example of a doctor violating valid voluntary informed consent under National Cabinet's COVID-19 vaccination mandates

For the attention of:

National Cabinet - Prime Minister, Premiers and Chief Ministers

Dear Anthony Albanese (PM), Chris Minns (NSW), Jacinta Allan (VIC), David Crisafulli (QLD), Roger Cook (WA), Peter Malinauskas (SA), Jeremy Rockliff (TAS), Andrew Barr (ACT), and Lia Finocchiaro (NT)

On 30 September 2025, I wrote to you asking:

Did **any** doctors warn the National Cabinet that **vaccine mandates violate valid voluntary informed consent for vaccination?**

This follow-up email provides direct, documented evidence of a doctor **publicly destroying the principle of voluntary informed consent for vaccination**, during the period in which **your governments imposed COVID-19 vaccination mandates upon the Australian people**.

In November 2021, ENT surgeon Chris Perry, then President of the Australian Medical Association (Queensland), **stepped outside his area of specialty to press COVID-19 vaccination upon the Australian community**, while appearing on Channel Nine's *Today* program with Karl Stefanovic and Ally Langdon.[1]

Responding to Karl Stefanovic's question about whether he supported the **"tough rules...if you're not vaccinated"**, Chris Perry responded:

Yes, we do. The AMA is the mouthpiece, the organisation that represents doctors. We know that 99.7% of our doctors firmly support vaccination and keeping the community safe, **so we talk...for the doctors...**

Chris Perry went on to make the following statements to intimidate the audience:

Chris Perry
Australian Medical Association
Queensland President 2020-2022

Channel 9 Today
November 2021

If you're not vaccinated it's going to be very, very hard to maintain a job, to be able to go anywhere.

People having weddings are going to have to weed out the unvaccinated.

The pubs and the clubs are going to have to find out whether people are vaccinated before they allow them in. Otherwise their businesses will go bankrupt.

They're crazy not to get vaccinated. Life will be miserable without being vaccinated...You won't be able to hide.

...you won't be able to get a doctor to sign off that you got an exclusion because there's quite set rules on that, and doctors will be audited to see, everyone of their exclusions will be looked at very carefully. They'll get fined, they can get struck off.

The patients who tell lies can be charged with fraud. There's a whole pile of issues, a whole pile of problems if you try and get round the system.

It's going to be very hard to maintain your employment if you're not vaccinated. You won't be able to go anywhere, for any entertainment.

So get vaccinated, otherwise you're going to have a very, very lonely life and you're not going to be able to maintain your employment.

These were threats, broadcast nationally by a senior medical figure, warning Australians they would lose their livelihood and social participation unless they submitted to vaccination.

Such conduct destroyed any possibility of valid voluntary informed consent, i.e. *The Australian Immunisation Handbook* notes "For consent to be legally valid":

It must be given voluntarily in the absence of undue pressure, coercion or manipulation.[2]

This requirement was affirmed by the Australian Government in letters to **Emma McArthur** (21 December 2021) and **to myself** (17 November 2022), confirming that:

Informed consent should be obtained for every COVID-19 vaccination, as per usual consent procedures for other vaccinations.

These letters, which are attached, also refer to *The Australian Immunisation Handbook* and the "**criteria for consent to be legally valid**".

The letters also confirm that practitioners **do not** have blanket liability protection for administering the COVID-19 vaccine products.

I now ask the National Cabinet to clarify:

1. Was Chris Perry - or any other high-profile doctor - **encouraged, supported, or recruited by government or its agencies** to promote the COVID-19 vaccination rollout and/or to publicly pressure Australians to comply with mandates?
2. Given the Australian Government's own acknowledgement of the obligation for **informed consent** for vaccination, **did any member of the AHPPC or National Cabinet** raise objections to this kind of coercive messaging?

The evidence provided in this email shows that the destruction of voluntary informed consent for vaccination was not accidental - **it was a deliberate act undertaken by those charged with upholding it.**

I again request a response from the National Cabinet on this most serious matter of public interest.

Sincerely

Elizabeth Hart
