

# AstraZeneca CEO: "...crush fake news from anti-vaxxers..."

and deliver the message the jabs could free the country from the pandemic."

After more than four years of the Covid scam, it's time to look back and see who shaped this scandal which resulted in the gross exploitation of the world's people, including mandated COVID-19 vaccination.

Consider for instance Pascal Soriot, the CEO of AstraZeneca, who lived in Australia when the AstraZeneca COVID-19 vaccine was being rolled out in March 2021.

## Coronavirus: AstraZeneca CEO Pascal Soriot says - vaccine is 100 per cent effective

AstraZeneca CEO Pascal Soriot called on the government to crush fake news from anti-vaxxers. Picture: Ryan

Pascal Soriot was the subject of an article published in *The Australian* on 5 March 2021 (paywalled), which noted that AstraZeneca was the biggest manufacturer of COVID vaccine at 100 million doses a months, set to double in April 2021, and had committed to supply three billion doses to 145 countries. CSL was on schedule producing the AstraZeneca vaccine in Australia, with Britain as the role model for a government-led rollout.

But Soriot was irked by ‘anti-vaxxers’ such as businessman Clive Palmer, who had taken out a full-page newspaper advertisement on “COVID-19 Vaccine concerns”.

According to the report in *The Australian*, Pascal Soriot:

called on the government to crush fake news from anti-vaxxers and deliver the message **the jabs could free the country from the pandemic.**

*“I don’t mean just the political leadership, I’m talking about the scientific leadership, the TGA in this country, the chief medical officers, the people in charge of vaccination guidelines and recommendations; those people need to speak up and educate and reassure, because people listen to scientists,”* he said.

*“The goal here is to protect as many people as possible to save lives, but also to **start the economy. We cannot do this if people do not get vaccinated.**”*

Quite extraordinary now to review how AstraZeneca’s CEO Pascal Soriot personally sought to direct the government, the regulator and the chief medical officers and scientists, **demanding the right to influence taxpayer-funded mass population vaccination policy**, and to control the public narrative on COVID-19 vaccination.

It seems Soriot’s underlying threat was things would not get ‘back to normal’, i.e. ‘start the economy’, *if people did not get vaccinated.*

Only *“the jabs could free the country from the pandemic”*.

It was all about ‘the vaccine’, ensuring the market for the vaccine...

*“The goal here is to protect as many people as possible to save lives, but also to **start the economy.***

***We cannot do this if people do not get vaccinated.”***

Pascal Soriot, AstraZeneca CEO

So much to look back on now in light of what has unfolded in the past four years...

Two fun questions to the yet unenlightened:

Q1. Given what you know today about the ineffectiveness of preventing transmission and dangers of injected vaccines and lockdowns and masks, and the high transmissibility and low dangers of covid infection, and the high level of immunity from infection, and knowledge of who was vulnerable to covid, what in hindsight would you have done differently?

[I think all but the maddest would now offer that we would have been better off following the long-established and then recently-updated 2019 Australian Pandemic Plan (which was to protect the vulnerable), rather than the Chinese Communist Party's 'create fear and lockdown and inject everybody' plan, including injecting children and those pregnant sort of people who weren't allowed to take aspirin or eat soft cheese.]

Q2. And which of these things that you know today were really actually unknown in April 2020?
