

# Australia's role in 'the pandemic'...

And other bits and pieces...

ELIZABETH HART

SEP 24, 2023

Consider an article recently published on *The Sydney Morning Herald*: ['Spy stuff' and front organisations: Moments that changed the course of Australia's pandemic.](#)

Sharing this *SMH* article because Australia has been a major player in the global Covid debacle, in getting this thing off the ground. Of course all the Five Eyes countries - the US, UK, Australia, Canada and New Zealand - are major players in this scandal, and each of their roles must be scrutinised, so I'm sharing info about Australia.

There's a lot to think about, and this was churning over in my mind recently, when I was re-listening to Ahmad Malik and Jonathan Engler's very interesting podcast discussion [dismantling the Covid Pandemic and mRNA 'Vaccine' Narratives.](#)

Have a close look at [the article on The SMH.](#) This propaganda article is aiming to provide some heroic narrative for the treacherous behaviour that has gone on in Australia. This all has to be picked over very carefully.

For instance the Doherty Institute - it was [the Doherty modelling](#) that put Australia into lockdown in March 2020, influenced by the infamous Neil Ferguson et al Imperial College London modelling, i.e. [Report 9.](#)

Jodie McVernon was instrumental in the Doherty modelling - she's mentioned in *The SMH* article...along with Christian Drosten, Anthony Fauci, Francis Collins and others.

Jodie McVernon is also on the Steering Group for the UK Royal Society's recent report aiming to justify restrictions and lockdowns, i.e. [Covid-19: examining the effectiveness of non-pharmaceutical interventions](#). Neil Ferguson was one of the people acknowledged “for peer review of this paper...”

In December 2020 [I challenged the Royal Society](#) about its failure to disclose its conflicts of interest in its [COVID-19 vaccine deployment report](#), its report that called for oppressive action against people questioning Covid-19 vaccination.

Speaking of the Royal Society, Laureate Professor Peter Doherty, the Patron and namesake of the Doherty Institute, is a Royal Society Fellow. A variety of interesting people are Fellows of the Royal Society, e.g. John Bell, see for example: [Tracking down John Bell: how the case of the Oxford professor exposes a transparency crisis in government](#). *The BMJ*, 24 February 2021.

*The SMH* article also refers to other Royal Society Fellows - Edward ‘Eddie’ Holmes “an influential figure in the pandemic” who was “the first to share the COVID-19’s genomic sequence, resulting in the development of the first COVID vaccine”, and Jeremy Farrar, who was Director of Wellcome, until stepping down [to take up the position of Chief Scientist of the World Health Organisation](#).

And...Francis Collins, until recently the Director of the US National Institutes of Health (NIH), is also a Fellow of the Royal Society - wow, quite a cosy and influential network...

***Really need to have a close look at the Royal Society, its Fellows and its influence...***

Another Australian connection - former Australian Prime Minister Julia Gillard is Chair of Wellcome.

And former Australian Prime Minister Scott Morrison called 'the pandemic' before the WHO in February 2020...***think about that***...the then Australian prime minister led the world on bedding in the aptly named 'PHEIC' ...aka ***fake***... (Press Conference Transcript 27 February 2020.)

Another key player from Australia - Jane Halton, Chair of CEPI, the front for the pandemic industry. Jane Halton was also involved with Event 201 in October 2019...the pandemic tabletop simulation about a coronavirus outbreak in Brazil that incredibly coincidentally preceded by just a few weeks the 'PHEIC' Covid coronavirus outbreak.

Jane Halton was a key adviser to then Prime Minister Scott Morrison during the Covid debacle, calling for 'no jab, no play' for adults in May 2020, i.e. calling for compulsory Covid vaccination in May 2020, before vaccines were even available...but I guess she knew they were coming...

The Murdoch Children's Research Institute is another key player in Australia...the original institute was founded with the assistance of Rupert Murdoch's mother, Elisabeth Murdoch. The MCRI is involved in vaccine research, including Covid vaccination research with the Doherty Institute. The MCRI is a corporate partner with the Murdoch media, i.e. News Corp Australia, which dominated the media narrative in Australia during Covid...also influential via *The Times/Sunday Times* in the UK, and Fox in the US.

The Murdoch media also ran the 'no jab, no play' campaign in Australia in 2013-2015 for coercive vaccination of children, supported by compliant politicians such as Scott Morrison, Tony Abbott, and Malcolm Turnbull and others.

As far as I'm aware, the Murdoch media didn't disclose its conflict of interest during its 'no jab, no play' media campaign in 2013-2015, i.e. its association with vaccination research via its corporate partnership with the Murdoch Children's Research Institute.

Former Prime Minister Scott Morrison actually raised the No Jab, No Pay bill when he was Social Services Minister in 2015, and in April 2015, the Murdoch tabloid *The Sunday Telegraph* reported then [Prime Minister Tony Abbott announces 'no jab, no play and no pay' policy for child vaccination](#). The end result was the coercive/incentivised No Jab, No Pay law for children's vaccination in January 2016.

Very interesting to revisit this now, considering how the 'No Jab' concept developed into 'No Jab, No Job'...'No Jab, No Life' in Covid times, particularly keeping in mind the Murdoch media's conflicts of interest in this area, i.e. its corporate partnership with the Murdoch Children's Research Institute which is involved in vaccination research, including Covid vaccination research with the Doherty Institute. (See [one of my emails to Scott Morrison](#) for more background.)

Also, re former Prime Minister Tony Abbott, it's just been announced he's been [nominated to join the board of the Murdoch led Fox Corporation](#).

These former prime ministers always seem to fall on their feet don't they? Former Prime Minister Kevin Rudd is now Ambassador of Australia to the US. Tony Blair is a UK example of continuing influence, with his Tony Blair Institute for Global Change. And they all seem to be linked to the World Economic Forum... For instance, take a look at [this extensive participant list](#) for a World Economic Forum Annual Meeting in 2014, when Tony Abbott was Prime Minister of Australia.

It's startling to consider the extent of the World Economic Forum's influence over the years, particularly its recent plan to use 'Covid-19' for its '[Great Reset](#)' - who knew what we were being stitched up for, *without our informed consent...*

Anyway...just throwing this information out there, the Australian connection. So much to investigate here...

Oh...and a bit more... *The SMH* article refers to Ron Fouchier. Ron Fouchier was at the centre of the 'gain of function' controversy that emerged in late 2011, see this article: [What Really Happened in Malta This September When Contagious Bird Flu Was First Announced?](#) This was when Ron Fouchier announced they'd "mutated the hell out of H5N1" ... And the scary lab-engineered deadly virus story was unleashed on the world... This was the research funded by Anthony Fauci/NIAID. There was a moratorium on the research. But you know what...it then turned out the hellishly mutated H5N1 wasn't deadly after all...[seems like it was all a beat-up](#)...just like Covid. But I guess the real intention was to beat up fear to bolster the increasingly lucrative flu vaccine industry.

More info... Ron Fouchier's boss then at Erasmus in the Netherlands was Ab Osterhaus. Osterhaus was known as Mr Flu re the 2009 Swine Flu/H1N1 hysteria. See these links re Ab Osterhaus: [Mega Corruption Scandal At The WHO](#) and [In Holland, the Public Face of Flu Takes a Hit](#).

Re 2009 Swine Flu/H1N1, see: [WHO and the pandemic flu "conspiracies"](#). After the 2009 H1N1 scandal, how has this happened again with Covid, completely batshit crazy this time?! (Also see my previous post: [After the Swine Flu scam in 2009...how could Covid happen?](#))

And another twist re Ab Osterhaus, which connects him to my original research into pet vaccination... When Osterhaus did his PhD, his supervisor was Marian Horzinek,

one of the authors on the original WSAVA Guidelines for the Vaccination of Dogs and Cats, which sent me down this incredible rabbit hole back in 2008...

Pet vaccination...to...human vaccination...it's all part of the big picture...'One Health'.

Just throwing this variety of information into the pot, these pieces of the jigsaw, to try and help unpick this diabolical shambles that has been foisted upon us.

And a reminder to have a look at [the article on The SMH](#), there's a lot to critically think about there...

Yes, a lot to think about, read about, uncover, connect dots etc.

Event 201 should be referred to as Event 21. Look carefully at the logo. the numbers 2 & 1 to the left & right respectively of a globe. What happened on an unprecedented scale during 2021? Ok, it started in December in the US, & then rolled out globally. The injections. In other words, that was the Event.

As a side note, there may be a pattern here: bacteria, crops, animals, humans. Engineered.

Bacteria are used to grow genetically engineered molecules. Actually, abused would probably be more accurate. Crops were tricked into expressing traits they wouldn't normally integrate into their genome thanks to the abuse of genetic modification, example being roundupready crops. Really, what a great idea it was to genetically alter a crop so that it could withstand poisons. Animals have been chipped for tracking reasons, livestock tagged for same, the future is genetic modification & biosensors. And finally humans, now being treated as livestock & pets, all the plans coming to fruition.
