

MANDATED vaccination... NO VALID CONSENT! It's mind-boggling!

More from an Australian perspective...

According to the Australian Government's [current statistics](#), **69 million** Covid-19 vaccinations have been administered in Australia, across a population of around 26 million, including children. This mass population medical intervention has been undertaken against a disease it was known from the beginning wasn't a serious threat to most people, [even the highly conflicted WHO admits this](#) for those who can read between the lines.

In my opinion, there is **NO VALID CONSENT** for any of those **69 million** Covid-19 vaccinations/medical interventions administered in Australia.

It's mind-boggling!

The medical 'profession' has largely supported coercive and **MANDATED MEDICAL INTERVENTIONS...in a supposed free country!**

I've sent lots of emails pleading for voluntary informed consent to be upheld, see links on this webpage: <https://vaccinationispolitical.net/vax-australia/>

The Royal Australian College of General Practitioners, the Royal Australasian College of Physicians, the Australian Medical Association - **they couldn't give a damn about voluntary informed consent.**

The regulator of practitioners, AHPRA, finally sent me [a letter in September 2021](#), confirming that:

"Practitioners have an obligation to obtain informed consent for treatment, including vaccination. Informed consent is a person's *voluntary* decision about health care that is made with knowledge and understanding of the benefits and risks involved." (My emphasis.)

Also in September 2021, [then Victorian Premier Daniel Andrews announced](#):

"There is going to be a vaccinated economy, and you get to participate in that if you are vaccinated...We're going to move to a situation where, to protect the health system, we are going to lock out people who are not vaccinated and can be".

In November 2021, [Chris Perry, the Queensland President of the Australian Medical Association](#), said:

"If you're not vaccinated, it's going to be very, very hard to maintain a job, to be able to go anywhere. People having weddings are going to have to weed out the unvaccinated. The pubs and clubs are going to have to find out whether people are vaccinated before they allow them in. Otherwise their businesses will go bankrupt."

And in January 2022, [then Western Australian Premier, Mark McGowan](#), said:

"Life will be very difficult for the unvaccinated from January 31. No pub, no bottle shop, no gym, no yoga class, no gig, no dancefloors, no hospital visits."

There it was, all laid out by members of the National Cabinet and the Australian Medical Association - 'No Jab, No Life'.

Where was the outcry? From AHPRA for instance? Why didn't AHPRA jump up and down and say registered practitioners must not collaborate with coercive/mandated vaccination, this violates voluntary informed consent? Not a peep out of AHPRA... Or the medical colleges.

AHPRA had already effectively mandated practitioners to support the government's Covid-19

vaccination rollout via the AHPRA Position Statement 9 March 2021, which I challenge in my email to AHPRA CEO Martin Fletcher, and Anne Tonkin, Chair of the Medical Board of Australia, and others, see: [Reckless disregard for voluntary informed consent - the AHPRA Position Statement 9 March 2021](#).

Australia's Chief Medical Officer, Paul Kelly, and the AHPPC, broke the ethical principle of voluntary informed consent for vaccination in June 2021, when they capitulated to the demand of then Prime Minister Scott Morrison and the Premiers

and Chief Ministers in the National Cabinet to 'recommend' compulsory vaccination for residential aged care workers. This set the precedent for a flood of vaccination mandates around the country. See [my notification to AHPRA about CMO Paul Kelly violating voluntary informed consent](#) for more background.

This is the biggest scandal of all time. The entire country was pressured, coerced and manipulated to submit to the Covid-19 injections at the behest of politicians, 'medical/health' officers, the medical 'profession', academics, and the mainstream media. Probably millions have submitted to the jabs under MANDATES to maintain their livelihoods and participate in civil society - 'No Jab, No Job'...'No Jab, No Life'... NO VALID CONSENT. The judicial system has supported these mandated medical interventions, apparently unaware of practitioners' legal and ethical obligation to obtain valid voluntary informed consent for vaccination.

And [the practitioners do not have specific medical indemnity for administering the Covid jabs](#). They might think they do, but they don't, [because the Morrison Government lied to them about this](#), around the time of the AstraZeneca blood clots emerging in 2021.

We have no mainstream media to break the story. And the treacherous taxpayer-funded ABC, chaired by Scott Morrison's 'captain's pick' Ita Buttrose, and SBS, have been worse than useless, they're a propaganda machine for the vaccine industry. There's been no critical analysis of the Covid debacle which has stolen the Australian people's freedom, looted them, and put them into enormous debt...enriching who exactly via this manufactured phony crisis?

The ABC have given us the likes of 'Dr' Norman Swan and 'Dr' Karl Kruszelnicki, promoters for the vaccine industry.

This isn't just about Covid-19 vaccination, the entire ever-increasing taxpayer-funded vaccination schedule must be investigated, the lucrative 'womb to tomb' schedule that is mired in conflicts of interest, with little or no transparency and accountability.

With the destruction that has been wrought upon freedom in this country, we need ethical practitioners to really make a grand gesture, stride into AHPRA's offices, protest on the steps of the parliaments or whatever. *Because the medical 'profession' is in ruins with its failure to uphold VOLUNTARY INFORMED CONSENT FOR*

VACCINATION. And they can't say they weren't warned about this, and the medical insurers, warned over and over again by me, but they refused to respond.

All doctors who administered Covid vaccines after the introduction of vaccination mandates were knowingly violating the requirement to obtain free and informed consent, irrespective of whether the patient requested the vaccine. Doctors were aware that all patients were subject to economic and social opportunity coercion to get vaccinated, and that most were liable to lose their livelihood if they did not comply. Under these conditions any request to get vaccinated could not be reasonably interpreted as voluntary.

Like myself , many on the sidelines of this , the biggest medical fraud in world history , were , and remain astounded at the pure absence of informed consent ...

I had x 2 AZ C V vaccinations in 2021 and requested to see the documents containing my ability to give " full informed consent "

The nursing staff that were installed and on duty to administer the CV vaccines in my GP 's practice building DID NOT KNOW what I was talking about !.... hmmm , do you get the picture !

I took them to task ! they didn't know what to do - after a further chat , they informed me to ...

* check & conduct my query on line , and find out that way , , ? w t f , they were administering a vaccine !

And , , wait for it -

* perhaps I should contact Craig Kelly, politician ; !! And find out from him

These details , along with a crude, consent to have a vaccine form used in the practice that day , were requested by a barrister in a legal case in 2022. (ref , Gillespie , & the mandates case) there has never been an outcome in this case.

Seems that many of the GP practices placed ' between a rock & a hard place ' when ' charged with getting jabs into arms , adopted a sub set of their ' normal legal requirement ' to obtain ' full and correct informed consent !

By this , I thought at the time , this half way house ' , whereby the GP 's clinic can escape the application of what would be their normal legal obligations to many legal issues - not the least being ' vaccine injury, death , and the obvious informed consent , re litigation, complaints & the GP's legal obligations
